Dear Mr. Drouare,

Yes this is correct. We received the approval from KDHE today for backfill/soil/sand etc to be disposed of at Rolling Meadows. See attached document. It is my understanding the old tank will be removed on Monday, December 12.

We are sending the additional impacted waters to Magellan Reclamation Facility under the same profile used in July of this year.

Thank you,

Robert

Notice of Profile Approval: 161670KS

Profile Number:	161670KS
Waste Stream:	Back Fill
Generator Name:	Sac & Fox Truck Stop
Disposal Site:	Rolling Meadows RDF
Comments:	A manifest is required for all shipments.
Expiration Date:	06/10/2017

Dear Robert Trump,

We are pleased to inform you that Profile 161670KS has been approved by our Midwest TSC Technical Service Center. Your Waste Approval Terms and Conditions can be found on either your *Profile Form* or *Approval Form*. Both

documents are available as a PDF in the *Approved Tab* in your WMSolutions.com account.

Please feel free to email us at TSCMidwest@wm.com or call 800-963-4776 with any questions.

Thank you for choosing Waste Management.

Subject: Work at Sac & Fox Truck Stop - LUST Site in Indian Country - Powhattan, KS

Importance: High

Based on the e-mails I am seeing the site work is going to commence sometime around December 12 and carry on through at least December 19.

The site investigation scope of work (my focus) sounds reasonable.

Any guess on the date that the old tank will be removed from the ground? We may want representatives on site to observe the removal.

What are the plans (handling and destination) for how contaminated soil and groundwater will be handled?

Make sure that all the parties involved are obtaining all necessary permit/approvals for handling/disposing of soil/water.
